

30 Farm Innovation

COLISEE study by ITAVI

in **Significant Impact Group(s)**: Housing and welfare ; Feed / gut health

Species targeted: Poultry;

Age: Young;

Summary: This scientific document is about starting conditions for broilers which are influencing antibiotic use and death rate in the first 10 days of a chick's life. A protocol has been developed to judge the chicks; within 24h after arrival at the farm and several other critical points. Several good practices are advised.
