**GLOBAL REPOSITORY OF AVAILABLE GUIDELINES FOR RESPONSIBLE USE OF ANTIMICROBIALS IN ANIMAL HEALTH**

by World Veterinary Association and OIE

**In Significant Impact Groups:**

Prudent use AB \ Veterinarian AMU reduction strategies

Species targeted: Pigs;Poultry;Dairy;Beef;Sheep;Other;

Age: Different for different species;

**Summary:**

In the context of promoting prudent use of antimicrobials under veterinary supervision, the World Veterinary Association (WVA) and the World Organisation for Animal Health (OIE) conducted in 2018 a survey in order to create a global repository of available guidelines for responsible use of antimicrobials in animal health.

This resource contains a list of 120 guidelines, action plans and promotional material on prudent use of antimicrobials, covering large number of countries, languages, veterinary aspects and animal species. Access to these guidelines shall serve veterinarians and other health professionals to identify best practices for antimicrobials use in animal health and to fight the development of antimicrobial resistance.
