KNMvD Guideline Antimicrobial use in dry cow therapy

by KNMvD

In **Significant Impact Groups:**

Prudent use AB \ Veterinarian

Species targeted: Dairy;

Age:

Summary:

This first veterinary guideline in the Netherlands was written to provide the bovine practitioners in the Netherlands with advice about prescription and use of antimicrobials regarding drying off dairy cows with minimization of preventive use of antimicrobials due to (sub)clinical mastitis (KNMvD 2014). The guideline is in Dutch and was published on 4 November 2013 and was adopted by the board of the KNMvD on 10 January 2014.
