Antimicrobial prescribing guidelines for pigs

by Cutler, R., Gleeson, B., Page, S., Norris, J. and G. Browning
2020 Australian Veterinary Journal 98: 105-134

In **Significant Impact Groups:**

Prudent use AB \ Veterinarian

Species targeted: Pigs;

Age: Adult;

Summary:

These guidelines for the Australian pig veterinarian are a handy 'go-to' resource, as they have been developed specifically for Australian conditions and contain the most contemporary knowledge available on AMR. I commend the work of all involved in the development of these guidelines, and urge every pig veterinarian to become familiar with these to deliver the best possible veterinary service to the Australian pig industry.
