Water medication calculator

by 3Tres3

In **Significant Impact Groups:**

\
Species targeted: Pigs;
Age:

Summary:

This simulator calculates the amount of medicine to be incorporated into the water when using a flow meter. To calculate the mother solution we must enter our data. If the amount of water consumed is not known, the simulator provides an approximation based on the number of animals, their weight, temperature and the amount of water wasted. In any case, from the amount of mother solution consumed on the first day of medication, the real water consumption can be calculated.
