Species targeted: Pigs;
Age:

Summary:

This guide is intended to cover issues related to veterinary medicines and their regulations; prior elements of responsible use such as preventive and biosafety measures, guidelines on veterinary diagnosis or prescription; design, monitoring and evaluation of treatment; the type of veterinary medicine used; storage and preservation of medicines; good administration practices or recommendations on treatment registration and disposal of medicine packaging and waste. These guides are intended as a reference tool for veterinary professionals, particularly younger ones, to ensure that veterinary medicines are used responsibly in their daily practice.
